iMarriage Study Guide-Andy Stanley 2010-04-14 Until Expectations May You Part Giddy with excitement and burning with love's fire, engaged couples are filled with desires and expectations! Wonder and eager anticipation propel them forward. Then comes the marriage and if they take the wrong approach, those unrealized expectations and unmet wants can turn a life-giving covenant relationship into a dead-end contractual agreement. Suddenly your marriage has no love, joy, or peace. In this marriage-makeover DVD and study guide from Northpoint Resources, Andy Stanley 's three key teachings help you transform your expectations and examine the "I's" of marriage: "Keeping My 'I' On You," "Putting Your 'I' Out," and "It Takes Three." Broken into six DVD sessions with discussion questions, this is one lesson your marriage won't survive without. Until Expectations Do Us Part Standing at the altar we all had a picture of what our marriage would look like. The problem is this picture of marriage ends up as expectations that we unload on our spouse. The weight of these expectations will rob your marriage of love and joy. As a spouse you never feel like you measure up and you never feel like you are good enough. So what are you to do with your expectations? You can't deny them because most expectations started out as God-given desires. In this six-session companion study guide to the DVD, Andy Stanley explains that you must instead learn to transform your expectations and look to God if you are to experience marriage as it was designed. This study guide is complete with a leader's guide and six lessons including conversation-starting exercises, discussion questions and application steps. Story Behind the Book Andy Stanley is the senior pastor of three North Point Ministries campuses, with a cumulative congregation of more than twenty thousand. As couples voiced their various marital struggles to him, the common root problem became undeniably clear. The "me" syndrome, or the "I" effect, was tearing apart husbands and wives who were once head-over-heels in love. To help couples step back from their immediate circumstances and realize the bigger picture, he preached a series called "iMarriage." This DVD and study guide will empower couples everywhere to transform their marriages into the one God intends for them.

Crash the Chatterbox-Steven Furtick 2015-07-21 Crashing the chatterbox = Overpowering lies of insecurity, fear, condemnation, and discouragement with the promises of God. "I used to think that someone who struggled with the kinds of weaknesses I deal with daily was useless to God. I felt so often like I was drowning in internal dialogue I couldn't control. It had been the soundtrack of my life for as long as I could remember. Yet everything changed when I began to realize God has given us the ability to choose the dialogue we believe and respond to. And once we learn how, we can switch from lies to truth as deliberately as we can choose the Beatles over Miley Cyrus on satellite radio. This is the key to pressing ahead and doing God's will anyway, even as you are bombarded with thoughts, feelings, and even facts about why you can't do it. I'm now awakening to the reality that we can access the power of God's promises to constantly crash the system of our broken beliefs. I'm learning how to overpower the shouts of the Enemy by bending my ear to the whisper of God's supernatural truths about my identity in Him and His strength in me." -STEVEN FURTICK, from Crash the Chatterbox Includes discussion questions for individuals or groups. The Dinosaur Artist-Paige Williams 2018-09-11 In this 2018 New York Times Notable Book,Paige Williams "does for fossils what Susan Orlean did for orchids" (Book Riot) in her account of one Florida man's attempt to sell a dinosaur skeleton from Mongolia—a story "steeped in natural history, human nature, commerce, crime, science, and politics" (Rebecca Skloot). In 2012, a New York auction catalogue boasted an unusual offering: "a superb Tyrannosaurus skeleton." In fact, Lot 49135 consisted of a nearly complete T. bataar, a close cousin to the most famous animal that ever lived. The fossils now on display in a Manhattan event space had been unearthed in Mongolia, more than 6,000 miles away. At eight-feet high and 24 feet long, the specimen was spectacular, and when the gavel sounded the winning bid was over \$1 million. Eric Prokopi, a thirty-eight-year-old Floridian, was the man who had brought this extraordinary skeleton to market. A onetime swimmer who spent his teenage years diving for shark teeth, Prokopi's singular obsession with fossils fueled a thriving business hunting, preparing, and selling specimens, to clients ranging from natural history museums to avid private collectors like actor Leonardo DiCaprio. But there was a problem. This time, facing financial strain, had Prokopi gone too far? As the T. bataar went to auction, a network of paleontologists alerted the government of Mongolia to the eye-catching lot. As an international custody battle ensued, Prokopi watched as his own world unraveled. In the tradition of The Orchid Thief, The Dinosaur Artist is a stunning work of narrative journalism about humans' relationship with natural history and a seemingly intractable conflict between science and commerce. A story that stretches from Florida's Land O' Lakes to the Gobi Desert, The Dinosaur Artist illuminates the history of fossil collecting—a murky, sometimes risky business, populated by eccentrics and obsessives, where the lines between poacher and hunter, collector and smuggler, enthusiast and opportunist, can easily blur. In her first book, Paige Williams has given readers an irresistible story that spans continents, cultures, and millennia as she examines the question of who, ultimately, owns the past.

Shaping Technology/building Society-Wiebe E. Bijker 1992 Technology is everywhere, yet a theory of technology and its social dimension remains to be fully developed. Building on the influential book The Social Construction of Technological Systems, this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history. The 12 essays address the central question of how technologies become stabilized, how they attain a final form and use that is generally accepted. The essays are tied together by a general introduction, part introductions, and a theoretical conclusion. The first part of the book examines and criticizes the idea that technologies have common life cycles; three case studies cover the history of a successful but never produced British jet fighter, the manipulation of patents by a French R&D company to gain a market foothold, and the managed development of high-intensity fluorescent lighting to serve the interests of electricity suppliers as well as the producing company. The second part looks at broader interactions shaping technology and its social context: the question of who was to define "steel," the determination of what constitutes radioactive waste and its proper disposal, and the social construction of motion pictures as exemplified by Thomas Edison's successful development of the medium and its commercial failure. The last part offers theoretical studies suggesting alternative approaches to sociotechnologies; two studies argue for a strong sociotechnology in which artifact and social context are viewed as a single seamless web, while the third looks at the ways in which a social program is a technology. Wiebe E. Bijker is Associate Professor at the University of Limburg, The Netherlands. John Law is Professor in Sociology at the University of Keele, Staffordshire, England.

The Globalization Paradox-Dani Rodrik 2011-03-24 For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.

The Art of Being Human-Michael Wesch 2018-08-07 Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and

to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Sugar and Spice-Jon Stobart 2016-12-01 Consumers in eighteenth-century England were firmly embedded in an expanding world of goods, one that incorporated a range of novel foods (tobacco, chocolate, coffee, and tea) and new supplies of more established commodities, including sugar, spices, and dried fruits. Much has been written about the attraction of these goods, which went from being novelties or expensive luxuries in the mid-seventeenth century to central elements of the British diet a century or so later. They have been linked to the rise of Britain as a commercial and imperial power, whilst their consumption is seen as transforming many aspects of British society and culture, from mealtimes to gender identity. Despite this huge significance to ideas of consumer change, we know remarkably little about the everyday processes through which groceries were sold, bought, and consumed. In tracing the lines of supply that carried groceries from merchants to consumers, Sugar and Spice reveals how changes in retailing and shopping were central to the broader transformation of consumption and consumer practices, but also questions established ideas about the motivations underpinning consumer choices. It demonstrates the dynamic nature of eighteenth-century retailing; the importance of advertisements in promoting sales and shaping consumer perceptions, and the role of groceries in making shopping an everyday activity. At the same time, it shows how both retailers and their customers were influenced by the practicalities and pleasures of consumption. They were active agents in consumer change, shaping their own practices rather than caught up in a single socially-inclusive cultural project such as politeness or respectability.

Reading Lolita in Tehran-Azar Nafisi 2003-12-30 We all have dreams—things we fantasize about doing and generally never get around to. This is the story of Azar Nafisi's dream and of the nightmare that made it come true. For two years before she left Iran in 1997, Nafisi gathered seven young women at her house every Thursday morning to read and discuss forbidden works of Western literature. They were all former students whom she had taught at university. Some came from conservative and religious families, others were progressive and secular; several had spent time in jail. They were shy and uncomfortable at first, unaccustomed to being asked to speak their minds, but soon they began to open up and to speak more freely, not only about the novels they were reading but also about themselves, their dreams and disappointments. Their stories intertwined with those they were reading—Pride and Prejudice, Washington Square, Daisy Miller and Lolita—their Lolita, as they imagined her in Tehran. Nafisi's account flashes back to the early days of the revolution, when she first started teaching at the University of Tehran amid the swirl of protests and demonstrations. In those frenetic days, the students took control of the university, expelled faculty members and purged the curriculum. When a radical Islamist in Nafisi's class questioned her decision to teach The Great Gatsby, which he saw as an immoral work that preached falsehoods of “the Great Satan,” she decided to let him put Gatsby on trial and stood as the sole witness for the defense. Azar Nafisi's luminous tale offers a fascinating portrait of the Iran-Iraq war viewed from Tehran and gives us a rare glimpse, from the inside, of women's lives in revolutionary Iran. It is a work of great passion and poetic beauty, written with a startlingly original voice. Praise for Reading Lolita in Tehran “Anyone who has ever belonged to a book group must read this book. Azar Nafisi takes us into the vivid lives of eight women who must meet in secret to explore the forbidden fiction of the West. It is at once a celebration of the power of the novel and a cry of outrage at the reality in which these women are trapped. The ayatollahs don't know it, but Nafisi is one of the heroes of the Islamic Republic.”—Geraldine Brooks, author of Nine Parts of Desire

Seals and Sealing in the Ancient World-Marta Ameri 2018-05-03 Studies of seals and sealing practices have traditionally investigated aspects of social, political, economic, and ideological systems in ancient societies throughout the Old World. Previously, scholarship has focused on description and documentation, chronology and dynastic histories, administrative function, iconography, and style. More recent studies have emphasized context, production and use, and increasingly, identity, gender, and the social lives of seals, their users, and the artisans who produced them. Using several methodological and theoretical perspectives, this volume presents up-to-date research on seals that is comparative in scope and focus. The cross-cultural and interdisciplinary approach advances our understanding of the significance of an important class of material culture of the ancient world. The volume will serve as an essential resource for scholars, students, and others interested in glyptic studies, seal production and use, and sealing practices in the Ancient Near East, Egypt, Ancient South Asia and the Aegean during the 4th-2nd Millennia BCE.

The Psychosocial Implications of Disney Movies-Lauren Dundes 2019-07-11 In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are

mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Ship of Magic-Robin Hobb 2003-12-30 "A truly extraordinary saga . . . The characterizations are consistently superb, and [Hobb] animates everything with love for and knowledge of the sea."—Booklist Bingtown is a hub of exotic trade and home to a merchant nobility famed for its liveness—rare vessels carved from wizardwood, which ripens magically into sentient awareness. Now the fortunes of one of Bingtown's oldest families rest on the newly awakened liveness Vivacia. For Althea Vestrit, the ship is her rightful legacy. For Althea's young nephew, wrenched from his religious studies and forced to serve aboard the ship, the Vivacia is a life sentence. BONUS: This edition includes an excerpt from Robin Hobb's Mad Ship. Praise for Robin Hobb and the Liveness Traders Trilogy "Fantasy as it ought to be written . . . Robin Hobb's books are diamonds in a sea of zircons."—George R. R. Martin "A major work of high fantasy, reading like a cross between Tolkien and Patrick O'Brian . . . one of the finest fantasy sagas to bridge the millennium."—Publishers Weekly "Rich, complex . . . [Hobb's] plotting is complex but tightly controlled, and her descriptive powers match her excellent visual imagination. But her chief virtue is that she delineates character extremely well."—Interzone
