GMDSS Manual -International Maritime Organization 2007 The entry into force and implementation of the global maritime distress and safety system (GMDSS) between 1992 and 1999 was the most far-reaching development in maritime emergency assistance since the invention of the radio. The GMDSS Manual presents the principles on which the GMDSS is based, the requirements for its implementation, the standards to be met by GMDSS equipment, and the method of operation of the various radio services which make up the GMDSS. The annexes give comprehensive information on all aspects of the GMDSS, including primary texts such as: relevant texts of the 1974 SOLAS Convention relevant to the GMDSS, relevant IMO Assembly resolutions, MSC and COM circulars, articles of the Radio Regulations, resolutions of WARC and WARC-Mob-87 conferences, IMO performance standards and related ITU-R recommendations, and the Master Plan for the GMDSS.--Publisher's description.
Automated Logistics Support Analysis Tool, Version 1.0 User's Manual, LSA Task 101, Early LSA Strategy - 1991 This User's Manual supports the automation of the US Army Logistic Support Analysis (LSA) Tasks and Subtasks. It is the complete users documentation package and provides guidance for using the Automated Logistic Support Analysis Tools (ALSAT). ALSAT provides a computer assisted guide to logisticians in the performance of LSA Tasks and Subtasks as defined in MIL-STD-1388-1a. It defines, organizes, tracks, models and reports on procedures that are used to develop supportability concepts. This particular module (one of four) fulfills the requirements of LSA Task 101, Early LSA Strategy. To effectively utilize ALSAT this manual should be used conjunctively with the Executive Module User's Manual ... Executive Module User's Manual, Task/Subtask User's Manuals, Automated Logistics support analysis, Tools, ALSAT, Logistics support analysis tasks.

Airplane Flying Handbook (Federal Aviation Administration) -Federal Aviation Administration 2017-07-25 The Federal Aviation Administration's Airplane Flying Handbook provides pilots, student pilots, aviation instructors, and aviation specialists with information on every topic needed to qualify for and excel in the field of aviation. Topics covered include: Ground operations Cockpit management The four fundamentals of flying Integrated flight control Slow flights Stalls Spins Takeoff Ground reference maneuvers Night operations And much more Updated to include the most current information, the Airplane Flying Handbook is a great study guide for current pilots and for potential pilots who are interested in applying for their first license. It is also the perfect gift for any aircraft or aeronautical buff.
User's Guide for the Longitudinal Scalogram Analysis Program -Ron D. Hays 1991 This Note is the user's manual for the Longitudinal Scalogram Analysis (LSA) program. LSA is an extension of cross-sectional scalogram analysis to longitudinal data. The LSA program has been used on Project ALERT to model stages of drug use involvement in adolescents. This revision of the original Note adds new information about the computation of standard errors and provides an example illustrating different longitudinal scalogram results for the same prevalence rates. The development of the LSA program was made possible by a grant from the Conrad N. Hilton Foundation and support from RAND. The opinions expressed are those of the author and do not necessarily reflect the views of the sponsor or RAND. The program and this manual benefited from insightful comments by RAND colleagues John Uebersax and Phyllis Ellickson, and from suggestions made by Paul Baerman and two anonymous reviewers (recruited by Duke University Press). Appreciation is also expressed to Pat Bedrosian for helpful editorial suggestions and Kim Wong for secretarial support.
